ACKNOWLEDGEMENTS

Thanks to everyone, especially to my supervisors and my mum. And obviously to the one who made that great template.

1 INTRODUCTION

This is a complete template for the MSc Geomatics thesis. It contains all the parts that are required and is structured in such a way that most/all supervisors expect. Observe that the MSc Geomatics at TU Delft has no requirements, so I took the liberty of formatting it the way I like. Well, I simply took the template `arsclassica` (by Lorenzo Pantieri), which is an adaption of the original `classicthesis` package from André Miede, and structured it in such a way that all sections are present.

It is not an official template and it is not mandatory to use it.

But I hope it will encourage everyone the use of LaTeX, and I also hope that it will discourage students to use Word...

If you run into mistakes/problems/issues, please report them on the GitHub page, and if you fix an error, then please submit a pull request.

1.1 FIGURES

As shown in Figure 2, it is possible to have two figures (or more) side by side. You can also refer to a subfigure: see Figure 2b.

1.1.1 Figures in PDF are possible (and better)

If you use Adobe Illustrator or Ipe you can make your figures vectorial and save them in PDF. You include a PDF the same way as you do for a PNG, see Figure 3,

1.2 HOW TO ADD REFERENCES?

Descartes [1637] wrote and another one too [Voronoi, 1908; Delaunay, 1934].

1.3 PSEUDO-CODE

Please try to not put code (Python, C++, Fortran) in your thesis. Put pseudo-code instead. The package `algorithm2e` is pretty handy, see for instance the Algorithm 1.1. All your algorithms will be automatically added to the list

Algorithm 1.1: How to write algorithms

while not at end of this document do
    read current;
    if understand then
        go to next section;
        current section becomes this one;
    else
        go back to the beginning of current section;
    end

of algorithms at the begining of the thesis.

A | REFLECTION

At P5 a reflection must be included as a distinct part of the thesis (a separate chapter) or as a separate document. In this reflection the student uses a short substantiated explanation to account for the results of the research in the graduation phase (product, process, planning). Depending on the research, reflection on a number of the following aspects should be included (you may choose in which order). The reflection should be in the form of a text, with diagrams and sketches for purposes of illustration and clarification.

ASPECT 1 The relationship between the methodical line of approach of the Master Geomatics and the method chosen by the student in this framework.

ASPECT 2 The relationship between the conducted research and application of the field geomatics.

ASPECT 3 The relationship between the project and the wider social context.

COLOPHON

This document was typeset using LaTeX. The document layout was generated using the `arsclassica` package by Lorenzo Pantieri, which is an adaption of the original `classicthesis` package from André Miede.
